

Using the Any() Method

Any() Method

- Any()
 - Are there any items in the collection?
 - Same as `Count() > 0`
- All(expression)
 - Do any items in the collection match the lambda expression?

Uses of Any() Method

Do any sales orders have a quantity greater than 10

Do any sales orders have a total greater than 10k?

Do any customers have a credit balance?

- Any() samples
