Using the Take() Methods

Take() Methods

- Take(int)
  - Takes only the specified # of rows from the beginning of the collection
- TakeWhile(Boolean condition)
  - Take only the specified # of rows from beginning of collection based on a condition
- TakeLast(int)
  - Take only the specified # of rows from the end of the collection
- Take(Range)
  - Takes the number of rows based on the Range operator supplied

Range Operator

Specifies the start and end of a range

Take(5..8) gives us elements 5, 6 and 7

Take(..4) goes from element 0 to 3

Take(10..) goes from element 10 through the end

Take(^5..^2) goes from the 5th element from end to 3rd from end

- Take() samples
